

Day 4

$$18 - 6 =$$

What is the time now?

$$6 \times 4 =$$

$$222\text{p} = \text{£}$$

What is the place value of 9 in 139

$$12 + 11 =$$

69 minutes = hours minutes

Which is heavier 8g or 1kg?

$$500 + 10 + 2 =$$

$$4 + 4 + 4 + 4 =$$

Write the number nine hundred and six.

$$\text{£}8.00 + \text{£}2.75 =$$

60, 70, 80, 90 what is the next number in the sequence?

What shape is this ?

On a digital clock the time is 15:20 this is

Minutes past

Simon measures his height he is 1.4 meters how many centimetres is this?

What Double 26?

$$28 \div 2 =$$

Joe is building a den he uses 8 big sticks his sister wants to make a den how many sticks will they need altogether

$$3 \times 9 =$$

Day 4

Answers

$18 - 6 =$

12

What is the time now?

$6 \times 4 =$

24

$222p = \text{£}$

£2.22

What is the place value of 9 in 139

9

$12 + 11 =$

23

69 minutes = hours minutes

1 hour

9 minutes

Which is heavier 8g or 1kg?

1kg

$500 + 10 + 2 =$

512

$4 + 4 + 4 + 4 =$

16

Write the number nine hundred and six.

906

$\text{£}8.00 + \text{£}2.75 =$

£10.75

60,70,80,90 what is the next number in the sequence?

100

What shape is this ?

Equilateral triangle

On a digital clock the time is 15:20 this is

Minutes past

20 minutes past 3

Simon measures his height he is 1.4 meters, how many centimetres is this?

140cm

What Double 26?

52

$28 \div 2 =$

14

Joe is building a den he uses 8 big sticks. Joes sister wants to make a den how many sticks will they need altogether ?

16

$3 \times 9 =$

27
